- Experienced in business writing and technical documentation

ABOUT ME

I am an English-speaking Information Technology student at North-West University (NWU), North West, South Africa. After two years of studying engineering, I transitioned to a BSc in IT to prioritize my mental health and rekindle my passion for coding. I am highly computer literate and proficient in several programming languages, which allows me to adapt quickly to new technologies and solve complex problems.

I am intuitive, determined, and eager to learn, consistently seeking opportunities to enhance my technical skills and knowledge. Additionally, my academic journey has refined my communication and technical documentation abilities, ensuring clarity and professionalism in all my work.

EDUCATION HISTORY

National Senior Certificate (NSC), Jan 2015 - Dec 2020

Thomas More College

B.Eng. Electro-Mechanical, Jan 2021 - Feb 2023

North West University

B.Sc. Information Technology Feb 2023 – Current

North West University

WORK EXPERIENCE

Team Leader | University App Development Project

- Assigned as the leader to coordinate the project's timeline, define features, and oversee documentation.
- Successfully managed the development process, ensuring timely delivery and effective collaboration within the team.

IT Intern | Thomas More College, October 2019

- Completed a one-month internship, gaining hands-on experience with the school's IT systems and server maintenance.
- Utilized Linux to develop an innovative Augmented Reality Sandbox, showcasing technical problem-solving and creativity.

INTERESTS

- Gaming has always been a big hobby of mine. Leading to me having run a team that placed 6th globally that consisted of 122 individual members based all over the globe, included in those 122 members was 12 members of staff I personally oversaw and delegated too.
After retiring from running my own team I currently reside in a team still placing top 50 word wide, which I now participate in, run server administration and bot development for discord, and conduct interviews and handle conflict which has taught me crucial people skills and conflict management.
- Bot development, I currently am finishing my 3rd bot on discord which all have a wide range of uses.
